History of corner establishment since Original Government Survey

41601122000

No known history since the original government survey from Monroe County survey records. Juneau County Survey records show a survey by J. L. Heath in October of 1862, of Section 7, T16N-R2E, and indicating he may have been at this corner.

J. Carroll was here in June of 1984 and in an earlier survey date.

Description of corner evidence found:

Set this corner in the existing north-south fence lines half way between section corners. This location fits other field evidence extremely well. The C% corner of Section 12, T16N-R1E, falls 2' south of the occupied corner. The NE corner of the SE%-NE% of said Section 12, would fit the occupied fence running west within 3'+. The C% and the NW corner of the NE%-SE% of Section 7, T16N-R2E, fits the fence line running east-west, virtually perfect.

Set TCP County Monument as the E% corner of Section 12, T16N-R1E.

Description of corner and witness monuments, references and accessories used to perpetuate the original or re-established location of this corner:
