History of corner establishment since Original Government Survey

Fred Holden was here in April of 1902 and calls for a stone at this corner. William Jung was here in June of 1975, found Holden's stone and obtained ties for a reference bar set next to the stone.

Description of corner evidence found:

I tied into this corner in December of 1990 and found no definitive point on the stone to measure to. Also the fenceline and 16" Tree as shown on Jung's tie sheet were gone. I felt maintanence on this corner was necessary. I located the exact center of the stone, referenced that point and replaced the stone with a cast iron Harrison marker. I obtained the ties as shown below.

wheel track of road.

Note: The 8" Hickory and the 9" White Oak are double blazed; the distance to each is to a nail set in a hack in the side of each tree. The 15" Black Oak is Jung's tree from 1975 and was not marked by me.
