BASIS FOR MONUMENT LOCATION

Show info such as: History of corner, with reference to Vol. and pg., dates, surveyor; exact description of monument replaced; if location computed, by taped or EDM traverse; landowner remarks, etc. (Use reverse side if necessary)

I have found no record of this corner being monumented since the original government survey. After extensive study. I placed the corner on the North-South fence line midway between section corners North and South. This makes the distance west short, but not unreasonable considering it is all creek bottom. The distance east to the occupied quarter corner is short, to the section corner is long. With these distances inconclusive, I decided the fence line was the best location. I drove a brass capped pipe at the corner and drove a steel witness post with sign 1.0 foot North.

CORNER VOL. 5 , PAGE 72.2 2 19 05 28 0000

History of corner establishment since Original Government Survey

2 1	90	35	Z	8		

Norman R. Hurlburt certify that on the 11th 19 83 . I found April (no evidence) of the __NU Sec. 34 corner of _____ Fourth Principal Meridian, and I reestablished said corner according to the Wisconsin Statutes as shown and described hereon.

Dated this 4th day of May 19 83 . Norman R. Hurlburt S-1104

None on record.

Description of corner evidence found:

This corner was set on the north-south fence line, equidistant between established corners 1 mile north and south. The distances east and west along this line are somewhat erratic, with no definite pattern to prove or disprove this location. so I accepted the northsouth fence line.

Description of corner and witness monuments, references and accessories used to perpetuate the original or re-established location of this corner: Section 34 Approved: HARLEY A.
