Repurpose of Funds Request / Highway Department / 14 February 2020

The Highway Department's 2001 Deere 644H Wheel Loader, Unit 234, has experienced engine failure and is rendered inoperable. This loader is a critical part of the fleet. The estimated cost of engine replacement is \$21,524.69.

Unit 234 was purchased in 2001 for \$162,811.77; it is now fully depreciated and had a residual 2018 book value of \$28,509.00. A 2019 sales report for that model identifies a national-average value of \$26,131.53. Replacing the engine on the current unit, at cost of nominally \$22,000.00, would result in a 19 year old machine still worth approximately \$26,000.00 with the potential of other major component failure over the next several years. A budget estimate for a new machine of the same size would be approximately \$225,000.00.

The 2020 operating budget has a contingency to replace 2 quad- or tri-axle patrol trucks, depending on the final F/Y 2019 balance forward. The budget allowance for those trucks is \$250,000.00 each. Given the delayed schedule in ordering those trucks, even if ordered today, delivery of the cab and chassis would likely not occur until late 2020, with an additional several months for installation of the box, plow, wing, controllers and accessory equipment.

The Highway Department's 2019 cost of a cab and chassis for that type truck was \$122,100.00. Given the importance of the wheel loader to the department's daily year-round operation and the currently projected 2019 balance forward, it is proposed to purchase 2 cab and chassis patrol trucks in F/Y 2020, defer the purchase of the mounted equipment to F/Y 2021, and apply a portion of the balance to the purchase of a new replacement wheel loader. Given that the new patrol trucks would not be available for use until 2021 in any event, this would not further detract from the department's operational effectiveness, and would provide for the timely replacement of the loader, the lack of which does.
