

Public Involvement Meeting

Project I.D. 5116-00-01
CTH N – T Clifton
Indian Creek Bridge B-41-0335
CTH A
Monroe County

October 1, 2024

Welcome

Welcome and thank you for attending the Public Involvement Meeting for the CTH A bridge replacement project. Mead & Hunt, Inc. has been selected by Monroe County to provide design engineering services for the reconstruction of the CTH A bridge over Indian Creek in the Town of Clifton. We are nearing completion of the preliminary design. Your input today is essential in the planning and design for this project, so please feel free to ask questions or express your comments and concerns on the comment sheet that is provided at the end of this packet.

Meeting Purpose

The purpose of this meeting is to gather public input, as well as to inform you about the proposed project. The meeting will follow a virtual presentation format.

Project Need and Scope

The current bridge on CTH A over Indian Creek has been rated as structurally deficient. This project will replace the existing single-span, concrete bridge with a new single-span concrete slab bridge. The project will also make upgrades to the bridge approaches. The total project length is not expected to exceed 630 feet. Construction is currently scheduled to be completed during the 2026 construction season. CTH A will be closed to traffic at the bridge during construction. Construction work is expected to take 2-3 months to complete.

Public Involvement

Public input is an important part of the design process, and your comments are welcome. A comment sheet is provided at the end of this handout for your use. To become part of the public record, all comments should be postmarked no later than October 22, 2024.
